Indoor Air is the Premier Global Conference for Scientific Research in Indoor Air Quality

The Indoor Air conference series stands as the world's leading scientific platform for advancing knowledge and solutions in indoor air quality and climate. Held biennially under the auspices of the International Society of Indoor Air Quality and Climate (ISIAQ), this flagship conference convenes a global community of experts committed to improving the health, comfort, and resilience of indoor environments.

The 2026 edition will take place under the theme "Enhancing Wellbeing in Existential Challenges: Deepening Understanding, Building Resilience", a timely and critical call to address the complex intersections of environmental health, societal stressors, and human wellbeing. This theme highlights the importance of science-based approaches to mitigate the evolving risks faced by our indoor spaces, from climate change to global health threats, and seeks to promote long-term resilience in the world environment.

Indoor Air 2024 attracted over 900 delegates from 39 countries, including world - renowned researchers, scientists, students, environmental professionals, and solution providers.

Conference Summary

18

Completed Indoor Air Conferences since 1984

600 – 900

International participants
(926 participants in 2024)

39 Countries

International Scope with Global Participation

800 – 900

Papers presented in Oral and Poster form

Attended by Academia and Professionals from diverse fields including Indoor Air Quality, the Built Environment, HVAC, Health Sciences, Public Health Policy, Chemistry, Biology, Psychology, Urban Planning, Mechanical Engineering, Architecture and Building Design and Management

Sponsorship Benefits at a Glance

Benefits	Platinum	Gold	Silver
	SGD 20,000	SGD 12,000	SGD 8,000
